

## SEWAK

### Observations:

1. Goes through each option shown.
2. Asked several questions:
  - a. *What value should I fill here?*
  - b. *What is “Hit Target”? Why is it in the Family Information section?*
  - c. *What are Day, Month, and Season? Season Should be filled automatically after selecting Month?*
  - d. *What is “Disciplinary Failure”?*
  - e. *What does the model predict, and what does “Predicted Result” mean?*

### Improvements & Comments:

- UI is good.
- “Hit Target” should not be in the Family Information section.

## PARAS

### Observations:

- Reads all features and information displayed.
- Asked:
  - o *What is Units per Day?*
  - o *What is Temporal Factor?*
  - o *What is LIME/SHAP ?*

### Improvements & Comments:

- Improve your model predictions.
- Fill blank spaces in the layout.

## PRAKHAR

### Observations:

- Asked: *Which feature affects the model prediction?*
- Debated which features influence the prediction and why.
- Asked: *What is Workload?*

### Improvements & Comments:

- Layout should be full-screen; there is no sense leaving empty space on the left and right—fill these areas with content.
- user interface is good.

## ANAND

### Observations:

- Asked: *What is Service Time? What is Workload? What is Hit Target? What is Temporal Factor?*
- Reads all information shown.
- Understood the model's predicted result.

### Improvements & Comments:

- Add more options in “Reason for Absence.”
- Season feature is not needed, it increases model load.
- Understood the explainability part.
- UI/UX is good.

## UJJAWAL

### Observations:

- Asked: *What is Hit Target? How is Workload Unit defined? What is Temporal Factor? What is Explainability?*

- Did not read the line “Workload intensity (200–350).”
- Understood the model’s predicted values.

**Comments:**

- Work unit is not globally defined for each person.
- Overall your Model and UI is good.
